Recommendations

Generated by fixed, rule-based checks against this scan's results — not an AI model.

[HIGH] Add ALT text to images

86 of 809 images (10.6%) are missing ALT text. ALT text helps accessibility and lets search engines understand image content.

[MEDIUM] Adjust title length

5 page(s) have a title outside the recommended 10–60 character range. Titles that are too short lack context; titles that are too long get truncated in search results.

[MEDIUM] Adjust meta description length

8 page(s) have a meta description outside the recommended 50–160 character range.

[MEDIUM] Improve slow-loading pages

8 page(s) took over 1.5s to respond. Slower pages tend to have higher bounce rates and can be down-ranked.

[LOW] Add Twitter Card tags

No Twitter Card meta tags were found. Adding them improves how links appear when shared on X/Twitter.

[LOW] Set explicit image dimensions

633 image(s) have no width/height attributes, which can cause layout shift while the page loads. Set explicit dimensions on <img> tags.

Page Findings Summary

URL	Status	Title	Words	Issues
https://www.bakingo.com/cakes/mumbai	200	Online Cake Delivery in Mumbai | Up	3075	5
